World NEWS

ISLAMABAD - Taliban militants on the Pakistan side of the volatile Afghanistan border have been accused by Pakistan army officers of looting, destroying property and causing the death of a Pakistani soldier in the Swat Valley. The rise in tensions is severely undermining a controversial agreement brokered between the central government and Taliban leaders in which the Taliban would have autonomy in governing the northern area under its own interpretations of Muslim strictures.

KATMANDU - Nepal's prime minister fired the country's army chief on Sunday over the general's refusal to allow former rebel fighters into army ranks as required by a UN brokered peace settlement. The resulting protests by opposition parties is creating a serious schism for the government. President Ram Baran Yadav says PM Pushpa Kamal Dahal, himself a former Maoist rebel leader, performed an unconstitutional act in firing the general.

ROME - A palestinian responsible for the death of an American citizen in the Achille Lauro cruise ship has been released by Italian authorities after serving 23 years in prison for the crime. Youssef Magied al-Moqui had been convicted of shooting Leon Klinghoffer, an elderly NY resident.

SWINE FLU UPDATE: OVER 250 US FLU CASES NOW

The first H1N1 flu death recorded in the U.S. is a child in Houston, Texas.

Connecticut public schools, all 1,100, along with an uncertain number of private secondary education schools, have received swine flu preparedness warnings from the state health department.

New York state cases are now over 60 confirmed of the H1N1 virus strain, mostly of students.

Cases have been reported in California, Texas, Arizona, Maine, Indiana, Kentucky and Connecticut.

Some Connecticut schools have temporarily closed as a precaution.

Over 160 people have died in Mexico where this strain of flu has taken on a deadly foothold in the western hemisphere Tamiflu is being offered as a cure-all. WHO, the World Health Organization, has its alert level at 5, one below the maximum alarm of 6.

The only preventative measures are to repeatedly wash hands and to avoid airborne pathogens from infected people.
